

DAVENPORT FIRE DEPARTMENT

2022 ANNUAL REPORT

MISSION STATEMENT

“The Davenport Fire Department is a proud organization which exists to protect life and property through education, prevention, and response”

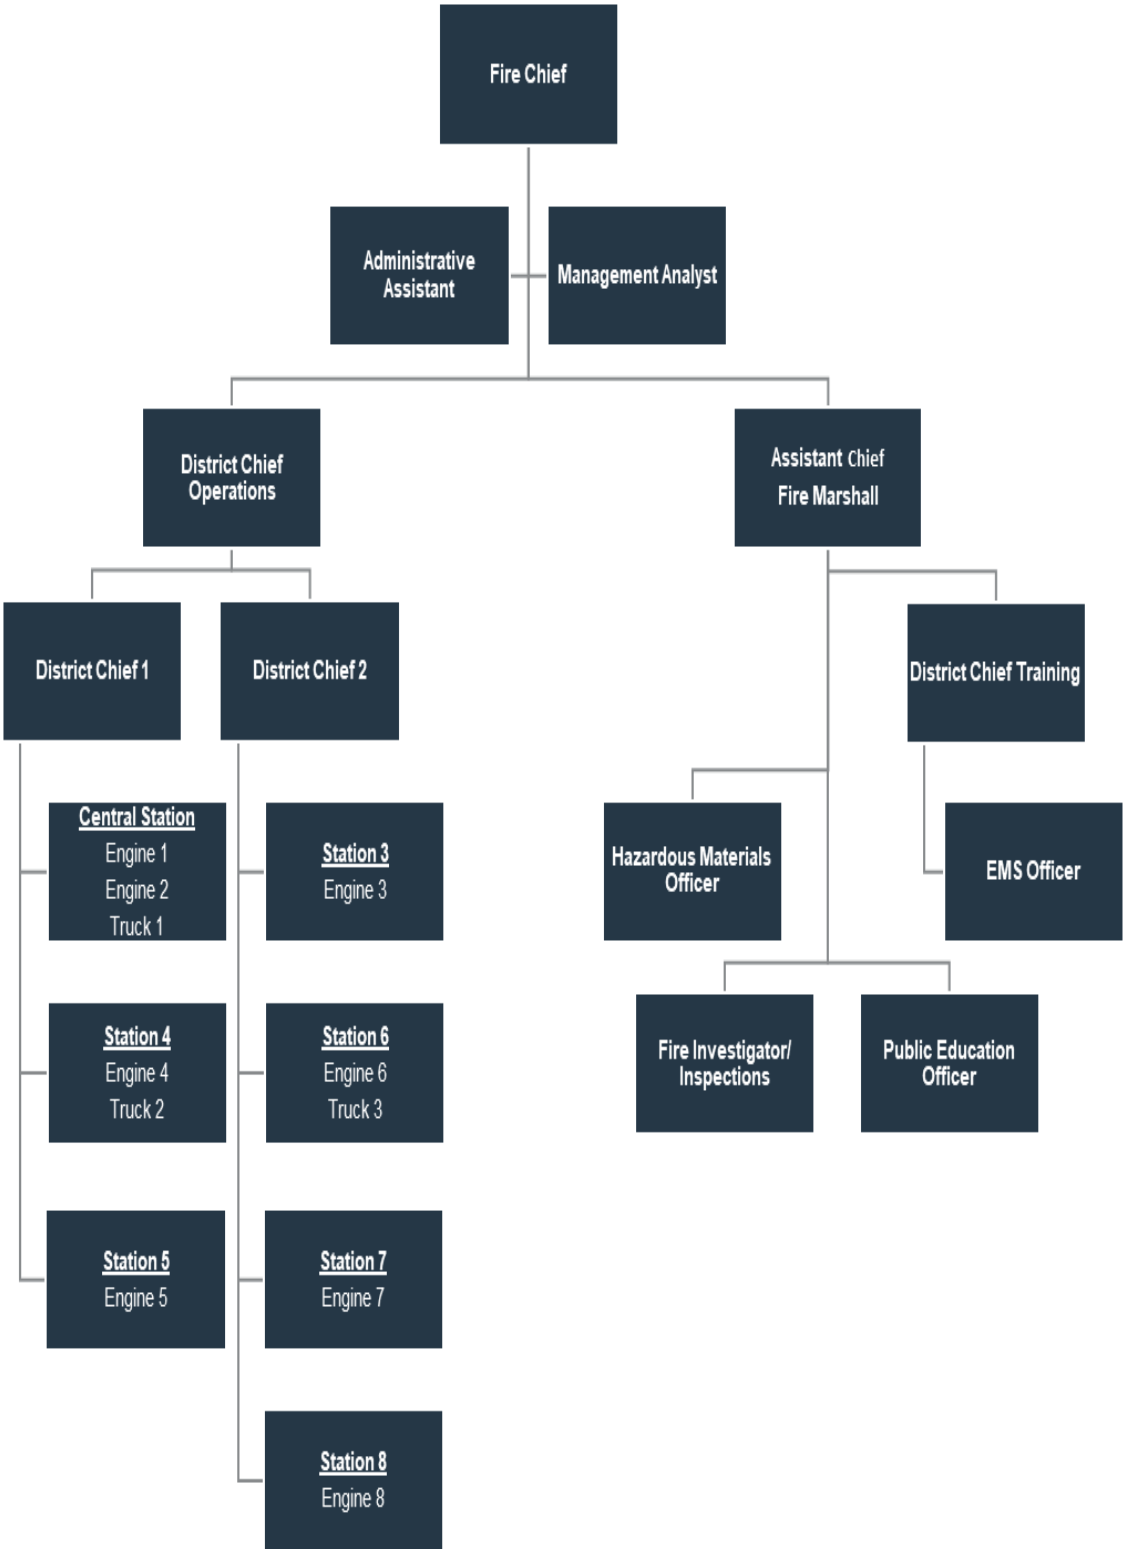

VISION STATEMENT

The Davenport Fire Department strives to be recognized as a progressive, well trained, and community focused emergency response organization.

This will be fostered by the following beliefs:

- Our workforce shall cultivate a cooperative and respectful team atmosphere by fostering more open forms of communication.
- Our department will continue to support a diverse, skilled, and healthy workforce; with a focus on physical and mental well-being.
- We will honor our community trust through an unwavering commitment to providing the most professional, efficient, and fiscally responsible services.
- We will expand our delivery model through innovation, technology, education, and external partnerships that will continue to shape our future.

DFD ORGANIZATIONAL CHART

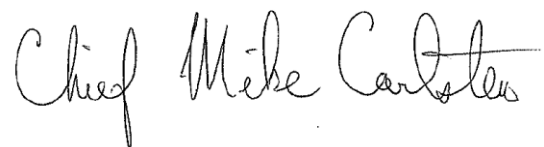

FIRE CHIEF'S MESSAGE

On behalf of the Davenport Fire Department, I am honored to present the 2022 annual report. In this report, you will find some of the performance related data for the department, and the milestones that were reached. The focus of the Davenport Fire Department is the safety of our responders while fulfilling the expectations of our community.

The Davenport Fire Department is proud to be an Accredited Agency with the Commission on Fire Accreditation International (CFAI). The Department is one of only 301 agencies to achieve this distinction with CFAI and the Center for Public Safety Excellence, Inc. (CPSE). In addition, the current Insurance Service Office (ISO) rating for the Davenport Fire Department is a Class 2/2X which reflects the liability insurance assessments for our commercial and residential property owners. The Davenport Fire Department is in the top 5% for ISO ratings country-wide. Both of these accomplishments demonstrates the commitment of our agency to provide the highest quality of service to our community.

Furthermore, I would like to thank the Mayor, City Council Members, and City Administration for their guidance and continued support of the Department. Finally, I would like to thank our Fire Department personnel for their constant display of our core values of integrity, excellence, responsiveness, professionalism, and compassion that represent this organization.

A handwritten signature in black ink that reads "Chief Mike Carlisle". The signature is written in a cursive style with a large, stylized initial "C" and a long horizontal flourish at the end.

SERVICES PROVIDED

Operations

The Operations Division is responsible for emergency response, the apparatus fleet, facilities maintenance, firefighter safety, risk management, information technology, suppression and maintenance division budgets, and the Capital Improvement Budget. Personnel assigned to operations include 6 District Chiefs, 11 Captains, 22 Lieutenants, 33 Engineers, and 55 firefighters. These personnel provide emergency response and non-emergency services to the community from 7 fire stations with as many as 11 fire companies. Day to Day suppression operations are supervised by District Chiefs (2 on each of the three shifts), as the city is divided into two districts, with Locust Street as the dividing line. The District Chiefs make personnel assignments, manage shift activities, and provide incident command at significant incidents.

Training

The Davenport Fire Department's Training Division provides training, education, and skills-based education to its personnel. This allows the Fire Department to serve the community of Davenport in a safe and efficient manner. The education and training that is provided to the firefighters of the DFD includes fire suppression guided by the National Fire Protection Association (NFPA) and State of Iowa, emergency medical training per Iowa Department of Public Health (IDPH), and additional National standards. Additional training is provided in technical rescue, hazardous materials and mandatory training in Occupational Safety and Health Administration (OSHA). This training which occurs throughout the year amounts to approximately 21,500 hours for 2022.

Fire Prevention

The Fire Marshal's office reviews all new building plans, and construction projects in conjunction with the Building department. Also, the Fire Marshal's office reviews the following plans: sprinkler and fire alarm/life safety to ensure code compliance. The Fire Marshal's office oversees the fire company based commercial business inspection program. In addition, the Fire Marshal's office participates in liquor license inspections, food truck inspections, final building construction inspections, and complaint inspections generated by the public. The Fire Marshal's office conducts daycare/school life safety inspections on behalf of the state Fire Marshal's office. Finally, the Fire Marshal's office maintains and enforces the 2015 International Fire Code with local amendments, along with National Fire Protection Association codes and standards.

Emergency Medical Services

The Davenport Fire Department (DFD) responded to over 12,500 medical calls for service in 2022. Currently, the Division of Emergency Medical Services (EMS) oversees 60 Paramedics and 66 EMTs. The EMS Division maintains the sole responsibility of closely monitoring every EMT and Paramedic, ensuring they are in compliance with all National, State, and local standards. Additional responsibilities of the EMS Division include: coordination of training and education, quality assurance and quality improvement, licensure renewals, state compliance, equipment maintenance, and liaison responsibilities within the medical community.

Hazardous Materials Division

The Davenport Fire Department Hazardous Materials Team consists of 35 Technicians and 4 Specialists. The primary responsibility is to serve the businesses and citizens of the City of Davenport, through emergency response and the Hazardous Materials Permit Program. This program assisted local businesses and citizens by providing assistance to 359 responses to hazardous materials emergencies. Along with responses, the team provided over 400 hazardous materials inspections to identify and address hazard assessments within the City of Davenport. The Davenport Fire Department's Hazardous Materials Team is one of 19

Hazardous Materials Regional teams across the state of Iowa. The mission of this team is to assist in large scale hazardous material incidents and provide response, consultation, and education to approximately 200 First Responders in Scott County, Clinton County, and Jackson County. Also, the Davenport Fire Hazardous Materials Team is 1 of 3 Weapons of Mass Destruction (WMD) Strike Force teams.

Technical Rescue Division

DFD personnel are trained and equipped to respond to technical rescue incidents. Current staffing levels include 29 active members on the Technical Rescue Team that operate at the operations and tech levels. More specifically, 12 members of the Technical Rescue Team are trained to the Technician level, while 17 members are trained to the Operations level. These individuals are trained to the following six NFPA identified disciplines: Rope, confined space, trench, water/ice, collapse, and vehicle/machinery. The remaining 103 members of the department are trained to the awareness level. The department has a heavy rescue vehicle equipped with a full inventory of rescue equipment including PPE for each technician. All apparatus have basic rescue hand tools, and seven of the eight pumpers have extrication equipment. The department also deploys three rescue boats for various water incidents on the river. However, the rescue boats are not dedicated to the tech rescue program, but can be utilized for the program.

Public Education

The Fire Prevention Bureau has a Public Education Officer that oversees all the life safety programs that are offered by the department. The education officer's responsibilities may include determining the need for and implementing life safety programs, and the scheduling of life safety events such as: stations tours, fire safety talks involving the smoke house, school talks, parade participation, social media engagement, and community service and outreach events. Additional programs include the smoke alarm program, child safety car seat checks, assisting with inspections and investigations. The Davenport Fire Department also provides programs to the public such as Career talks, Smoke alarm installs, Youth Firesetter Intervention, Firefighter Career Explorer program, and school visits.

2022 MAJOR EVENTS

140th Anniversary Celebration: Open Houses

2022 marked the 140th anniversary of the Davenport Fire Department being a municipal Fire Department. The Department commemorated this occasion by hosting open houses at each fire station. Approximately 500 members of the public attended the open houses which were conducted throughout the summer and fall culminating with the final open house being hosted during Fire Prevention Week. The open houses served as a great opportunity for each station to help showcase the unique responsibilities of that station, and of the fire department and allowed for attendees to ask questions and learn more about the department.

CO Detector Program

In 2022 the Department began a Carbon Monoxide (CO) detector installation program in conjunction with the Quad City Area Fire Marshals' Association. This program is mirrored after our Smoke Detector Installation program as it requires recipients to be a resident of Davenport and to own their home. In 2022, the Department installed over 50 CO Detectors

Facilities

The Station 3 Project has been progressing throughout the year of 2022. Station 3 is being built at 42nd and Brady Street. The City Council approved a bid from Tricon General Construction at the June 22nd meeting. A groundbreaking ceremony was held August 31st, and construction on the site began the first part of September. Tricon General Construction is the general contractor leading this project, which is expected to be completed near the end of calendar year 2023.

Radio Project

Along with the surrounding agencies in Scott County, the City of Davenport has transitioned to a new P25 digital radio system in 2022. This conversion is expected to bring improved communication and interoperability, not just within the Department, but throughout outside agencies as well.

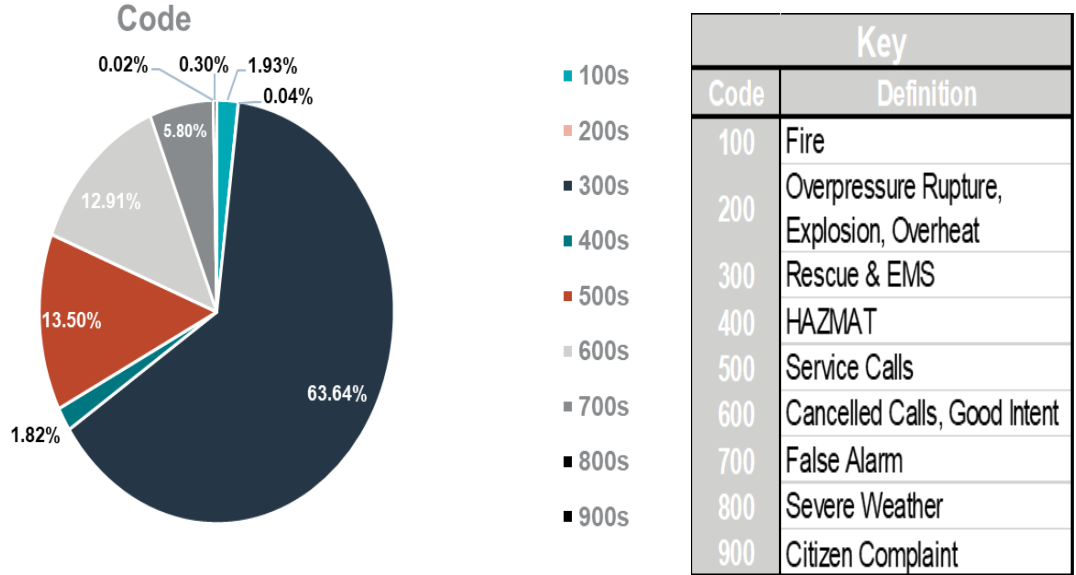

Training

This year, DFD is focused on providing our firefighters with outside training opportunities. Over the past 12-months, the Department offered several training opportunities to members of the department as well as outside agencies. These classes provide our firefighters opportunities to stay current with state certifications, obtain specialized technical training, and provide expanded techniques exposing our firefighters to current industry trends. This training allows us to better serve our community.
